

THE CHARTERED  
INSURANCE INSTITUTE

## The Chartered Insurance Institute Environmental Policy Statement

The Chartered Insurance Institute is the world's largest professional organisation for insurance and financial planning and is the leader in awarding qualifications to industry practitioners. With over 120,000 members in more than 150 countries, we are committed to protecting the public interest by guiding professionals towards higher technical and ethical standards.

As a business we are committed to minimising our impact on the environment. Our key environmental impacts have been identified as electricity, travel and gas consumption. To improve our environmental record we have implemented a carbon reduction programme in our offices, measured our carbon footprint and put in place an action plan for improvement.

As part of our carbon reduction commitment we will:

1. Look to reduce our carbon footprint with key areas being electricity, travel and gas efficiency.
2. Measure and monitor our electricity, gas, water, travel, paper and waste consumption data which will allow us to track our progress and set further targets for reduction.
3. Appoint and maintain a Green Champions focus group in order to engage staff across all sites and to drive change
4. Where possible, use energy from sustainable sources
5. Remain cognizant of environmental legislation and ensure compliance with any amendments
6. Fulfil our Climate Wise membership commitments\*

We will raise awareness internally through our action plan of the steps we need to take to reduce our carbon footprint and achieve our targets. We will use our web site and social media to promote our green credentials and services to our existing and prospective clients. Our environmental policy will be publicly available via our website.

The Green Champions at The Chartered Insurance Institute will be responsible for continuing the development of the action plan and directing the implementation the environmental policy, as well as managing the subsequent reduction of the carbon footprint.

This Policy is wholeheartedly supported by the CII Board. The Board will review this policy annually and monitor performance based on the 6-point carbon reduction commitment.
